

REMARKS

The Examiner is requiring an election between:

Invention I, claims 1-7, 15-19 drawn to a method for constructing a viewed component, classified in class 427, subclass 100; and

Invention II, claims 8-14, drawn to a viewed component, classified in class 428, subclass 195.1.

In accordance with the Examiner's request, the Applicant elects Invention II, drawn to a viewed component. The Applicant believes claims 8-14, as originally filed, and newly added claims 20-30 read on invention I, as elected.

Claims 1-7 and 15-19 have been canceled. The Applicant reserves the right to prosecute claims, in a separate application, to the remaining subject matter of the application, including the subject matter of the canceled claims.

New claims

Claims 20-30 are newly added in this paper and are believed by the Applicant to read on the invention elected above.

CONCLUSION

It is believed that all of the stated grounds of rejection have been properly traversed, accommodated, or rendered moot. Applicant therefore respectfully requests that the Examiner reconsider and withdraw all presently outstanding rejections. It is believed that a full and complete response has been made to the outstanding Office Action and the present application is in condition for allowance. Thus, prompt and

favorable consideration of this amendment is respectfully requested. If the Examiner believes that personal communication will expedite prosecution of this application, the Examiner is invited to telephone the undersigned at (248) 641-1600.

Respectfully submitted,

Dated: May 24, 2006
